

New Programs

Early Childhood Education

A career in Early Childhood Education could be for you if you have a passion for children and want to help and guide young minds toward a lifetime of learning. Get expert skills and real world experiences in PJA's program that prepares you for opportunities working in daycare centers, pre-schools, corporations, government agencies and primary grade schools.

Health Information Technology

PJA's Health Information Technology program educates students to work in a variety of health care settings managing health information databases and systems. President Obama sees health care information in general as a key to improving the quality of care while reducing costs. Get in on the growth as major government agencies and private sector companies invest in this area of health care.

Medical Billing & Coding

Learn how to gather, code, manage and maintain patient health information, and submit and track medical insurance claims and reimbursements. Gain valuable medical terminology and computer skills necessary to help run and efficiently maintain today's modern health care facilities. Get ready to work in Doctors Offices, Medical Clinics, Labs and Insurance Offices.

Medical Assistant

Help doctors help people and get a career in caring. Medical Assistants perform a wide variety of clinical and administrative skills including taking vital signs, blood pressures, EKG, phlebotomy, records management and examination prep. It's no surprise that Medical Assistant represents one of the fastest growing occupations in the country. PJA graduates are qualified to enter the Medical Assistant field with confidence and opportunity to succeed.
